Art Unit: 2612

1. This Office action is in response to the application filed March 12, 2004. Claims 1-18 are pending.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Matt Abrew on May 26, 2006.

The application has been amended as follows:

Claim 1. (Currently Amended) A method for downlink communication with a downhole tool having a mud-powered downhole motor, comprising:  
receiving a sensor signal indicative of a rotational speed of a rotor in the mud-powered downhole motor; and  
interpreting the sensor signal to derive a downlink signal.

Claim 10. (Currently amended) A downlink communications system for a downhole tool, comprising:  
a mud-powered downhole drilling motor disposed in the downhole tool;  
at least one sensor disposed in the downhole tool for making measurements indicative of a rotational speed of a rotor in the mud-powered downhole motor; and

Art Unit: 2612

an electronics package operatively coupled to the at least one sensor and configured to interpret a downlink signal based on an output of the at least one sensor.

In claim 11, line 1; change "108" to "10"

3. Claims 1-18 are allowed.

4. The following is an examiner's statement of reasons for allowance: the claims recites and apparatus and method for communicating a downlink signal to a downhole tool by using a sensor to make measurements indicative of the rotational speed of the rotor or a mud-powered motor. The prior art teaches the interpretation of a downlink signal by making measurements of the rotational speed of a turbine. As stated in the instant specification, this method is limited because of the limited dynamic range of signals generated by the turbine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert K. Wong whose telephone number is 571-272-3057. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wendy Garber can be reached on 571-272-7308. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
